

BUILDING ENGAGEMENT AT SIAM

BE@CSE25

A BRIGHTER SCIENTIFIC FUTURE IS ON THE HORIZON

We are pleased to announce a program designed to support individuals from all STEM groups while also catalyzing change in the community to create a more vibrant and modern scientific environment.

Organized by **Sustainable Horizons Institute**, the next program, **BE@CSE25**, will be held during the SIAM Conference on Computational Science and Engineering (CSE25), March 2 - 7, 2025, at the Fort Worth Convention Center, Fort Worth, Texas, U.S.

Your sponsorship will provide funding for students from all over the country, enabling their participation. **Activities include a full technical conference program, tutorials, research presentations, small learning groups (Guided Affinity Groups) with daily meetings, and career development.** By supporting these students, you help encourage a variety of voices in STEM, offering them invaluable educational and networking opportunities.

Key Benefits:

The Building Engagement program will **provide scientific training, mentoring, and career and professional development** to students who aspire to broaden their experience in research based professional activities.

The program also works to **catalyze change** in the community to create a more fun and vibrant society by providing opportunities for scientists to:

- Get involved as a volunteer
- Learn how to create a more modern and welcoming scientific community
- Become an advocate

Past Participants Quotes:

"The BE program wasn't just a community and a scientific family I became a part of, it helped me to really understand things I didn't even know I wanted before. It's helped to define a lot of my goals going into my fifth and final year of school."

"There really is no telling where I'd be right now, had I not participated in the BE program. But, chances are, I would not have had the courage to make a change [and switch into a mathematics program]. The Mentor Protégé Program was also incredibly influential to me."
